09	Pricing	25	10	Merchant Onboarding	27
11	After the Sale	29	12	Best Practices	31
13	Quick Reference	33			

How to use this playbook

Read it once cover to cover. Then keep Section 13 — Quick Reference — within arm's reach in the field. Every pitch, answer, and checklist you need is there.

SECTION 01

Welcome to the hive

You're not selling software. You're handing local businesses a faster, fairer way to get paid.

IN THIS SECTION**01** Welcome from the founders**02** Our mission**03** Why Nectar Pay exists**04** What your role really is

You're early — and that's the whole point.

Welcome to Nectar Pay. If you're reading this, you've chosen to stand at the front edge of how money moves through Main Street — and we don't take that lightly.

For decades, small businesses have quietly accepted a bad deal: pay 3% to accept a payment, wait days for the money, and absorb a chargeback whenever someone disputes it. They were told that's just the cost of doing business.

It isn't. Technology has moved on — the fees haven't. We built Nectar Pay to close that gap

with a tool any merchant can set up in an afternoon and explain to a customer in one sentence.

Your job as an Ambassador isn't to convince anyone of anything. It's to listen, show them the math, and let a better deal speak for itself. The merchants you serve will remember who brought it to them.

Treat every shop like it's the only one. Be honest about what we do and don't do. Build trust before you build a portfolio. Do that, and you'll be welcome in those businesses for years.

Bobby Gray
Founder

"Honest money, built for the people who actually use it."

Tim Blake
Head of Sales

"Every merchant deserves a fair shot — we just hand them the tools."

Gaige Blake
Sales Trainer

"Master the basics, stay genuine — the rest takes care of itself."

Our mission

To give every local business a payment system that's *faster, fairer, and built for what's next* — without the fees, delays, and fine print of the old way.

Faster

Funds settle to the merchant's wallet in seconds — not days.

Fairer

No percentage cut on crypto sales. No surprise chargebacks.

Future-ready

Ready for how the next generation expects to pay.

Why Nectar Pay exists

- ✓ **Fees quietly eat margins.** Card processing takes 2–4% of every sale, every day, forever.
- ✓ **Chargebacks punish the honest.** A single dispute can wipe out a day's profit on a delivered sale.
- ✓ **Money moves too slowly.** Waiting days for a deposit strains cash flow for small operators.
- ✓ **Customers are changing.** A growing wave of buyers wants to pay with crypto — and reward those who let them.

 SECTION 02

A better deal, right on time

The market is moving toward merchants who can accept new forms of money. You're showing up at exactly the right moment.

IN THIS SECTION

- 01 Why crypto payments are growing
- 03 Why businesses are ready for change

- 02 The merchant pain points

Why crypto payments keep growing

You don't need to predict the future to sell Nectar Pay. You only need to notice a trend that's already underway — and help merchants get ahead of it.

ADOPTION TREND

More people hold and spend crypto every year

Global crypto owners, millions. Source: Crypto.com Market Sizing Reports, 2021–2025.

Mainstream on-ramps

Buying crypto is now as easy as opening an app most people already trust.

Lower, faster networks

Modern rails make small, instant payments practical — not just big transfers.

A generation that expects it

Younger customers increasingly expect the option to pay in crypto.

The takeaway for merchants

They don't have to "believe in crypto." They just have to be ready for the customers who already do — before their competitor on the next block is.

What's quietly costing them money

Every merchant lives with these four frictions. Most have simply stopped noticing them. Your job is to name them out loud.

Processing fees

2–4% disappears on every card sale. On thin retail margins, that can be a third of the profit on the item.

Slow settlement

Money earned today shows up days later. Payroll, rent, and restock can't wait on a processor's calendar.

Chargebacks

A delivered sale can still be reversed weeks later — plus a dispute fee. The merchant loses the goods and the money.

No new customers

Their terminal takes money — it doesn't bring anyone through the door. Marketing is a separate cost entirely.

Why businesses are ready now

01

Margins are tight

Every point of fee saved goes straight to the bottom line.

02

Customers ask

"Do you take crypto?" is a question more owners are hearing.

03

Setup is finally easy

No technical knowledge required — that barrier is gone.

 SECTION 03

What Nectar Pay actually is

Before you can sell it, you have to be able to explain it in one breath. This section makes you fluent.

IN THIS SECTION

- 01 What Nectar Pay is
- 03 Why it matters to a merchant

- 02 How it works, step by step

A simple way to accept crypto in person

Nectar Pay is a **merchant terminal** that lets any local business accept cryptocurrency payments in person — and have the funds land **directly in their own wallet**, instantly.

THE HARDWARE

A countertop terminal that displays a payment request and a QR code. Plug in, sign in, start accepting.

THE MODEL

Non-custodial. Nectar Pay never holds the money. It moves straight from customer to merchant.

THE BONUS

Cards keep working exactly as they do now. Nectar Pay simply adds a **no-fee lane** beside them.

SAY IT LIKE THIS

"It's a little terminal that lets you take crypto payments — and the money hits your wallet the second the customer pays. No middleman, no waiting."

Four steps. About ten seconds.

From "that'll be \$12" to settled funds — here's the entire flow a customer experiences at the counter.

THE KEY DIFFERENCE

The old way

Customer → Card network → Bank → Processor → (2–3 days) → Merchant, minus 2–4% and exposed to chargebacks.

With Nectar Pay

Customer → **Merchant's wallet**. Direct. Instant. No percentage cut on crypto. No chargebacks.

Why this is more than a new terminal

A card reader processes a payment. Nectar Pay changes three things a merchant actually feels — control, cost, and growth.

Control of their own money

Funds go straight to a wallet the merchant owns. No account freezes, no holds, no processor sitting in the middle deciding when they get paid.

Real money kept, not skimmed

No percentage fee on crypto sales means the margin that used to vanish into processing stays in the business — on every single transaction, forever.

Every dollar arrives whole

No percentage skimmed, no dispute reversals, no waiting period. What the customer pays is what the merchant keeps — the same day.

SECTION 04

Six reasons merchants say yes

Each one stands on its own. Together, they make the old terminal look expensive. Learn to lead with the one that fits the merchant in front of you.

IN THIS SECTION

- | | |
|--------------------------------|---------------------------------|
| 01 Lower costs | 02 Instant settlement |
| 03 No chargebacks | 04 Crypto acceptance |
| 05 Customer acquisition | 06 Future-ready payments |

What's in it for the merchant

Lower costs

No percentage cut on crypto sales. The 2–4% that card networks take simply isn't there — that margin stays in the business on every transaction.

LEAD WITH THIS

Instant settlement

Money lands in seconds, not business days. Cash flow stops waiting on a processor.

No chargebacks

Crypto payments are final. A delivered sale can't be reversed weeks later.

Crypto acceptance

Serve the growing group of customers who want to pay this way — without the bank.

Directory listing

Merchants appear on the Nectar Pay map, so nearby crypto customers can find them. (Planned)

Customer acquisition

A merchant directory listing can route nearby crypto customers toward the door.

Future-ready payments

As money modernizes, the business is already set up — not scrambling to catch up later.

Show them the savings

You rarely need to argue. You just need a napkin. Here's a simple, honest illustration you can walk through with any owner.

CARD PROCESSING TODAY

Card sales / month **\$10,000**

Processing fee ≈ 3% **— \$300**

Lost per year **— \$3,600**

Gone to fees / yr **\$3,600**

WITH NECTAR PAY

Processing fee on crypto **\$0**

Terminal (one-time) **\$499**

Subscription / year **\$228**

Year-one cost **\$727**

5x

The reframe

A merchant losing ~\$3,600 a year to card fees could fund the entire first year of Nectar Pay roughly five times over — just from the crypto sales that move off cards. Everything after that is margin they keep.

Illustrative example for explaining the model. Actual savings depend on each merchant's sales mix. Card processing still applies to card transactions.

SECTION 05

Who to look for first

Some businesses are simply readier than others. Start where the fit is obvious and your early wins will fund the rest.

IN THIS SECTION**01** The eleven best-fit business types**02** What makes a great fit**03** Green flags to look for

Where Nectar Pay lands easily

High transaction volume, thin margins, repeat customers, or a younger crowd — these eleven check at least one box.

**Coffee shops**

High volume, loyal regulars.

**Restaurants**

Tight margins, fee-sensitive.

**Retail**

Many small transactions.

**Salons**

Repeat bookings, loyalty.

**Medical**

Larger tickets, fewer disputes.

**Contractors**

Big invoices, instant payout.

**Churches**

Donations without fees.

**Nonprofits**

More of every dollar kept.

**Bakeries**

Fast, frequent purchases.

**Professional services**

High-value engagements.

**Event venues**

Large tickets, young crowds.

+ anyone tired of fees & slow payouts

GREEN FLAGS

- ✓ Owner-operated
- ✓ Complains about fees
- ✓ Younger clientele
- ✓ Repeat customers

 SECTION 06

Where the conversations start

Prospects are everywhere you already are. The trick is having a system, so finding them never relies on luck or mood.

IN THIS SECTION

- 01 Seven prospecting channels
- 02 A repeatable weekly rhythm
- 03 Turning every win into the next lead

Seven ways to fill your pipeline

Networking

- 01 Lead with curiosity, not a pitch. Collect owners, not business cards.

Walk-ins

- 02 Be a customer first. Buy something, then ask one good question.

Referrals

- 03 Your happiest merchant is your best salesperson. Always ask, "Who else?"

Community events

- 04 Markets and fairs are full of owners — and perfect for a live demo.

Chamber of Commerce

- 05 Instant credibility and a room of decision-makers who already network.

Social media

- 06 Post local wins. Tag the merchants you onboard. Let proof do the prospecting.

Local business groups

- 07 Facebook groups, BNI, neighborhood associations — warm rooms, warm intros.

A SIMPLE WEEKLY RHYTHM

- 5 new conversations started
- 3 follow-ups with warm leads
- 1 demo booked or delivered
- ∞ referrals requested, every time

BEFORE YOU WALK IN

- ✓ Know their name and what they sell.
- ✓ Terminal charged, demo ready.
- ✓ Come in off-peak — never mid-rush.
- ✓ Buy something first. Be a customer.
- ✓ One clear ask before you leave.

 SECTION 07

The conversation that converts

Great ambassadors don't pitch — they diagnose. Master a simple arc and the close takes care of itself.

IN THIS SECTION

01 How to start conversations

02 Discovery questions

03 Listening with intent

04 Presenting Nectar Pay

Five moves, in order

Resist the urge to present early. Earn the right to by understanding them first.

1

Open warmly

Be a customer or a neighbor first. *"I love this place — how long have you been here?"* No pitch yet.

2

Discover

Ask about their business and how they take payments today. Let them describe the problem in their words.

3

Listen — really

Talk less than half the time. Nod, repeat back what you heard, and resist solving too soon.

4

Diagnose the pain

Name the cost of the status quo. *"So fees take a real bite, and the money still takes days?"*

5

Present the fit

Now — and only now — show how Nectar Pay solves the exact thing they just told you.

THREE OPENERS THAT WORK

"Mind if I ask — do you get a lot of customers asking to pay with crypto?"

"What's the most frustrating part of how you take payments right now?"

"If you could cut your card fees to zero on some sales, would that be worth two minutes?"

Questions that open doors

DISCOVERY QUESTIONS

- › How do most customers pay you today?
- › What do you pay in card processing fees?
- › How quickly do you actually get your money?
- › Ever been hit with a chargeback you couldn't fight?
- › Has anyone asked to pay you in crypto?
- › What would bringing in new customers be worth to you?

Open, not yes/no. Every question should invite a story, not a one-word answer.

LISTENING, THE RIGHT WAY

- ✓ Talk 30%, listen 70%.
- ✓ Repeat their words back to them.
- ✓ Let silence do some work.
- ✓ Take notes — it shows you care.

PRESENT IN THEIR LANGUAGE

Pick the **one or two benefits** that map to what they told you — then show, don't tell. Pull out the terminal, run the demo, let them watch a payment settle. End with a clear, small next step: *"Want me to get you set up this week?"*

 SECTION 08

Objections are buying signals

An objection means they're considering it. Welcome each one calmly, answer it honestly, and keep moving.

IN THIS SECTION

01 The six common objections

02 What each one really means

03 Calm, honest responses

Answer the six you'll hear most

01 "My customers don't use crypto."

→ "Totally fair — and you keep taking cards exactly as you do now. This just adds an option for the ones who do, at zero processing cost. You lose nothing and you're ready when they ask."

02 "Isn't crypto risky or too volatile?"

→ "Good question. The payment settles to your wallet instantly — you decide what to hold and what to convert. You're in control of the exposure, not the other way around."

03 "It sounds complicated."

→ "It's honestly simpler than your card terminal. Enter the amount, customer scans, done. I'll set the whole thing up for you and walk your team through it — takes one afternoon."

04 "I already have a payment system."

→ "Keep it. Nectar Pay sits alongside it — for the sales that move to crypto, you skip the 2–4% fee entirely and get paid instantly. Think of it as a no-fee lane, plus a way to bring new customers in."

05 "What does it cost?"

→ "\$499 for the terminal and \$19 a month — that's it. No percentage of your sales. Most owners make that back from the fees they stop paying. Want me to run the numbers for your shop?"

06 "Let me think about it."

→ "Of course. What's the one thing you'd want to be sure of before saying yes? Let's settle that now — and I'll check back Thursday either way."

 SECTION 09

Pricing you can say out loud

No tiers, no asterisks, no percentage of their sales. You can quote the whole thing from memory — and that simplicity sells.

IN THIS SECTION

01 Terminal & subscription

02 Year-one and ongoing cost

03 What you earn as an ambassador

Simple, honest, memorable

TERMINAL

\$499

one-time hardware

SUBSCRIPTION

\$19/mo

flat — no % of sales

YEAR ONE, ALL IN

~\$727

then ~\$228 / year

EVERY TERMINAL INCLUDES

- ✓ Accept cryptocurrency payments
- ✓ Instant wallet settlement
- ✓ Non-custodial — funds go straight to the merchant
- ✓ No processing fees on crypto transactions
- ✓ No chargebacks
- ✓ Merchant directory listing (planned)
- ✓ Access to future Honest Money features

WHAT YOU EARN (CURRENT PROPOSAL)

Ambassador economics

\$150

acquisition bonus per merchant

20%

recurring on subscription, year one

~\$196

est. first-year earnings per merchant

SECTION 10

From yes to up-and-running

The sale isn't done when they agree — it's done when they take their first payment. This checklist gets them there fast.

IN THIS SECTION**01** The seven-step checklist**02** Setup & test payment**03** Training the staff

Onboard in seven steps

Walk every merchant through the same path. Consistency is what makes you look — and feel — like a professional.

01 Confirm the fit & collect details — business name, contact, and what they sell.

02 Complete the order — terminal + subscription, payment collected.

03 Set up the merchant wallet — where their money will land. Confirm they control it.

04 Activate & pair the terminal — power on, sign in, connect to the wallet.

05 Run a live test payment — a few dollars, start to settled, in front of them.

06 Train the staff — everyone at the counter does one transaction themselves.

07 Book the check-in — schedule your 7-day follow-up before you leave.

 SECTION 11

The work that pays you twice

The first sale earns a commission. The relationship after it earns referrals, testimonials, and a portfolio that compounds.

IN THIS SECTION

01 Merchant success

02 Follow-up cadence

03 Testimonials

04 Referral requests

Make the first 30 days great

Merchant success

Their first real payment is the moment that matters. Be reachable, fix snags fast, and celebrate the win with them.

Follow-up cadence

Day 1, day 7, day 30, then monthly. A two-minute "how's it going?" keeps you the trusted face of Nectar Pay.

Testimonials

When they say "this is great," ask right then: "Mind if I grab a quick quote or photo?" Proof makes your next ten sales easier.

Referral requests

"Who else do you know who'd love to stop paying card fees?" A happy merchant will hand you two or three names.

Make them your reference

A merchant who is genuinely happy in month one becomes your proof for the next ten. Get the quote, get the photo, get the two names — then keep showing up.

 SECTION 12

How professionals carry themselves

Everything you do reflects on Nectar Pay and on you. These six habits are what separate a trusted advisor from a salesperson.

 IN THIS SECTION

01 Professional appearance

03 Follow-up cadence

05 Integrity

02 Communication

04 Relationship building

06 Compliance

Represent Nectar Pay well

Professional appearance

Dress like the businesses you serve respect. Clean, simple, branded. You are the product's first impression.

Clear communication

Plain language, no jargon. If a merchant looks confused, slow down. Clarity builds trust faster than enthusiasm.

Follow-up cadence

Do what you said, when you said. A reliable check-in beats a charismatic pitch every single time.

Relationship building

Be a regular, not a vendor. Buy their coffee, learn their names. The portfolio is built on genuine connection.

Integrity

Never oversell or overpromise. If Nectar Pay isn't a fit, say so. Honesty today is the referral tomorrow.

Compliance

Follow all program guidelines and local rules. Never give tax, legal, or investment advice — point merchants to the right professional.

 SECTION 13

Keep this within arm's reach

Everything you need in the field, on two pages. Pitches you can recite, answers you can trust, a checklist you can run.

IN THIS SECTION

01 Elevator & 30-second pitch

03 FAQ

02 The 5-minute presentation

04 Master checklist & resources

Three pitches, memorized

ELEVATOR PITCH • ONE BREATH

"Nectar Pay lets you accept crypto payments with **zero processing fees** — and the money hits your own wallet instantly, with no chargebacks, ever."

THE 30-SECOND PITCH

"You know how card processing takes 2–4% of every sale and you wait days for the money? Nectar Pay is a little terminal that lets you take crypto instead — no percentage fee, funds in your wallet in seconds, and no chargebacks. It's \$499 and \$19 a month, flat — no percentage of your sales, ever. Want to see it work? Takes two minutes."

THE 5-MINUTE PRESENTATION

0:30 **Connect**

Compliment, ask how they take payments today.

2:30 **Show the product**

Run a live demo — payment to settled.

4:30 **Price & handle objections**

\$499 + \$19/mo, answer one concern.

1:30 **Name the pain**

Fees, slow payouts, chargebacks.

3:30 **Run the math**

Their fees vs. their year-one cost.

5:00 **Ask for the yes**

"Want me to set you up this week?"

Fast answers

FREQUENTLY ASKED

Does the merchant need to understand crypto?

No. They enter an amount; the customer handles the wallet. You set everything up.

Where does the money go?

Straight to the merchant's own wallet. Nectar Pay is non-custodial — it never holds funds.

Can they still take cards?

Yes. Nectar Pay sits alongside whatever they use now — it's an added, no-fee lane.

What if they want to cash out?

They control their wallet and decide what to hold or convert, whenever they like.

How long does setup take?

An afternoon. Most merchants take their first live payment the same day.

THE 60-SECOND CHECKLIST

- ☐ Right fit? (volume, fees, crowd)
- ☐ Asked, then listened
- ☐ Demoed a live payment
- ☐ Quoted price clearly
- ☐ Asked for the yes
- ☐ Booked the follow-up
